

✓ Frontend Screens vs Backend Endpoints Mapping (SERV App)

Below is the clear mapping of **frontend screens** with their corresponding **backend APIs**, and the Firestore collections used for data storage.

♀ 1. Login Page

- **Screen:** Login (Employee/Admin)
- **Backend Endpoint:** POST /api/auth/login
- **Collection:** users

🔗 2. Register Page

- **Screen:** Signup form (Admin creates employees)
- **Backend Endpoint:** POST /api/auth/register
- **Collection:** users

● 3. Change Password

- **Screen:** Profile → Change Password
- **Endpoint:** POST /api/auth/change-password
- **Collection:** users

🔒 4. Forgot Password

- **Screen:** Forgot Password Popup (enter email → reset)
- **Endpoint:** POST /api/auth/forgot-password
- **Collection:** users

NG 5. Create Employee Page

- **Screen:** Create Employee
- **Endpoint:** POST /api/employees
- **Collection:** employees

UP! 6. My Attendance Page

- **Screen:** Calendar view + stats
- **Endpoint:** GET /api/attendance/:empId
- **Collection:** attendance

🔔 7. Attendance Report Page (Admin)

- **Screen:** Daily/monthly reports
- **Endpoint:** GET /api/attendance/report?date=...
- **Collection:** attendance

8. Leave Request Form

- **Screen:** Request → Add Leave
- **Endpoint:** POST /api/leaves
- **Collection:** leaves

9. Leave Approvals Page (Admin)

- **Screen:** Filter by type/status
- **Endpoint:** GET /api/leaves + PUT /api/leaves/:id
- **Collection:** leaves

10. My Rewards Page

- **Screen:** Employee Reward view
- **Endpoint:** GET /api/rewards/:empId
- **Collection:** rewards

11. My Tasks Page

- **Screen:** View tasks + Upload daily update
- **Endpoints:**
 - GET /api/tasks/:empId
 - POST /api/tasks/upload
- **Collection:** tasks

12. Feedback Form

- **Screen:** Feedback form
- **Endpoint:** POST /api/feedback
- **Collection:** feedback

13. Event Upload (Admin)

- **Screen:** Add new event
- **Endpoint:** POST /api/events
- **Collection:** events

14. Event Updates Page (User)

- **Screen:** View upcoming events
- **Endpoint:** GET /api/events
- **Collection:** events

15. Company Setup/Profile (Admin)

- **Screen:** Admin fills company details
- **Endpoints:** POST /api/company, GET /api/company
- **Collection:** company

16. File Uploads (from task/events)

- **Screen:** Upload files or images
- **Endpoints:**
 - POST /api/files/upload
 - GET /api/files/view/:name
 - GET /api/files/download/:name
- **Collection:** files

17. Static Pages

- **Screen:** Terms & Conditions / Privacy Policy
- **Endpoint:** GET /api/static/terms, GET /api/static/privacy
- **Collection:**  Not required (serve as constants)

Firestore Collections Required

Make sure these collections exist (they will be auto-created on `.add()`):

```
users
employees
attendance
leaves
rewards
tasks
events
feedback
files
company
reports
```

Notes:

- `authController.js` handles all user/password logic.
- `fileController.js` saves upload metadata to Firestore.
- PDF/image files are saved in `/uploads/` folder locally.

 Visual Diagram and Admin-Only Mapping are now included below.

Visual Flow Diagram (Simplified)

```
[Login/Register] └─> [Auth Controller → users collection]
                  └─> Forgot Password
                  └─> Change Password

[Create Employee] ──> [employees collection]

[My Attendance] ────> [GET attendance/:empId]
[Attendance Report] -> [GET attendance/report]

[Leave Request] ────> [POST leaves]
[Leave Approvals] ──> [GET + PUT leaves]

[Rewards View] ─────> [GET rewards/:empId]

[My Tasks] ─────────> [GET tasks/:empId, POST tasks/upload]

[Feedback Submit] ───> [POST feedback]

[Event Upload] ─────> [POST events]
[Event View] ───────> [GET events]

[Company Setup] ─────> [POST + GET company]

[File Uploads] ─────> [POST upload, GET view/:name, GET download/:name]
```

Admin-Only Pages and Endpoints

Page	Endpoint	Description
Create Employee	POST /api/employees	Admin creates employees
Attendance Report	GET /api/attendance/report	Admin views summary
Leave Approvals	GET + PUT /api/leaves	Admin filters & approves
Event Upload	POST /api/events	Admin adds events
Company Setup	POST /api/company	Admin submits company profile
